

	PROJECT Fusor Device				
	TITLE Fusor Hemisphere				
APPROVED	SIZE B	CODE	DWG NO		REV
CHECKED					
DRAWN William Butler 8/7/2026	SCALE 1:2		WEIGHT		SHEET 1/1

SECTION A-A
SCALE 1:2

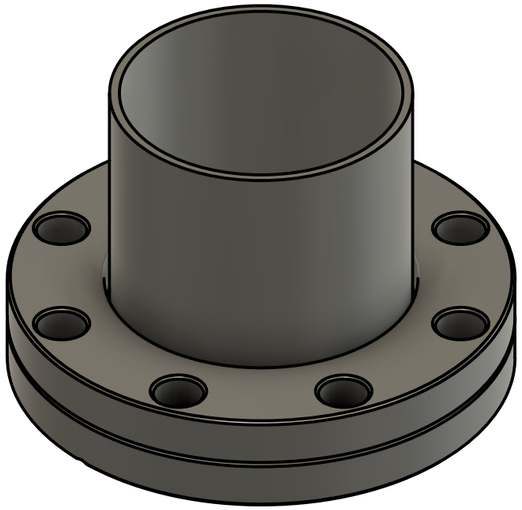

Inner diameter of bottom "lip" must be increased from 7.89" to 8" to maintain contact with steel hemisphere.

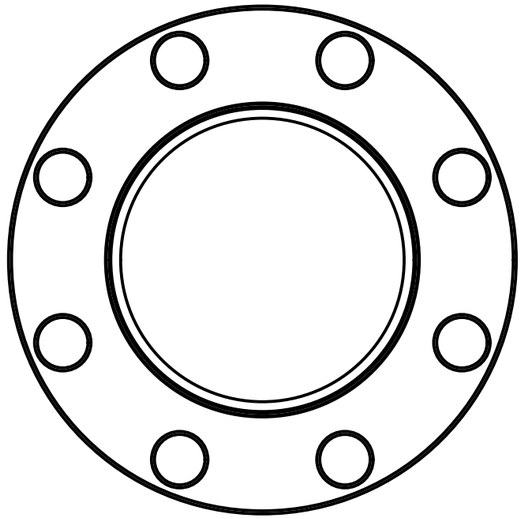

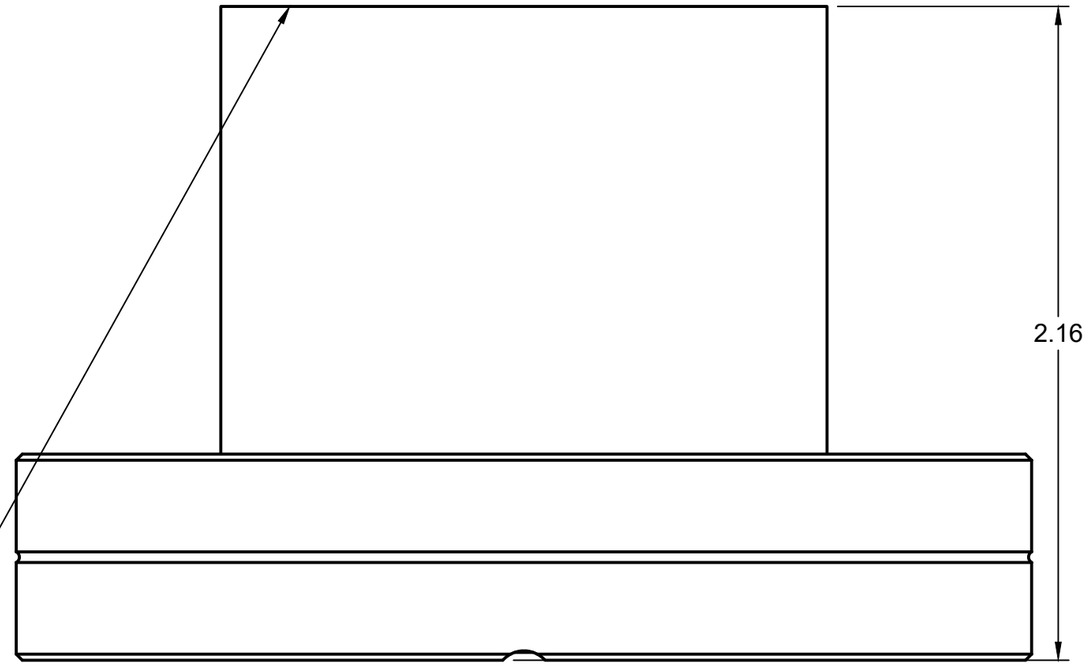

DETAIL B
SCALE 4:1

Machined "groove" width and height (shown here as 8.15" X .12") are viable for alteration. Designed as a relief groove for weld at bottom of steel hemisphere.

PROJECT: Fusor Device				
TITLE: Machined KJL fixed flange				
APPROVED	SIZE	CODE	DWG NO	REV
CHECKED	B			
DRAWN William Butler 8/7/2026	SCALE 1:2	WEIGHT	SHEET 1/1	

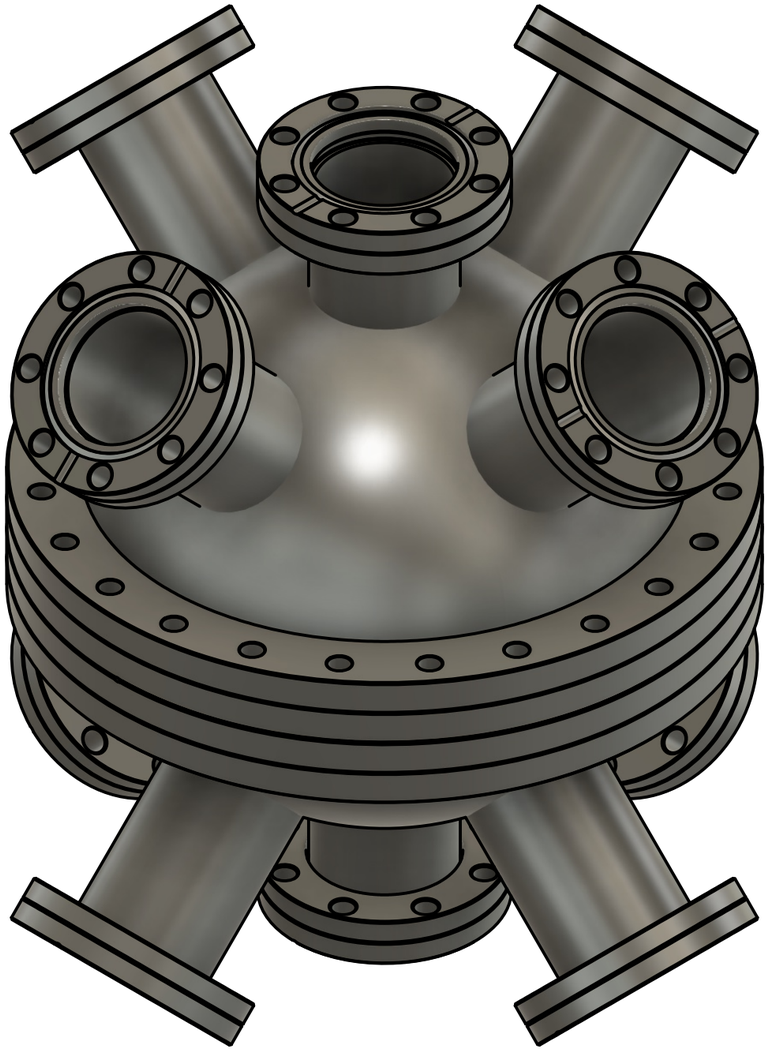

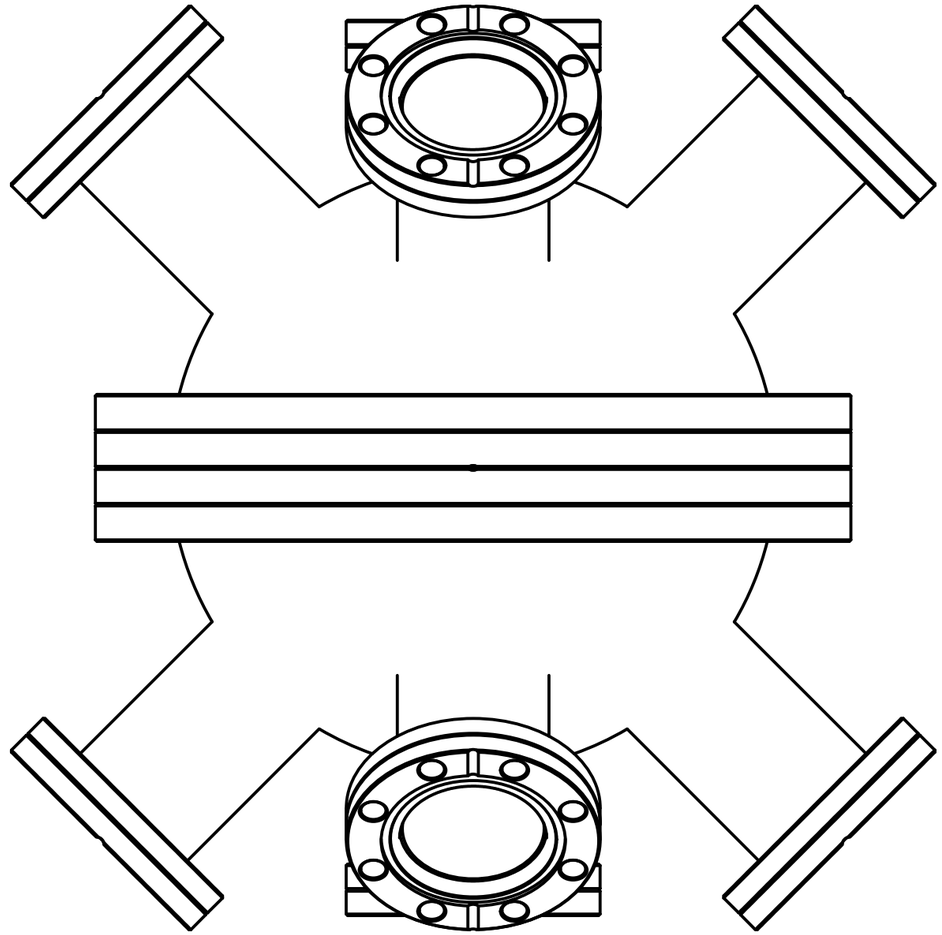

Central tube must be machined to decrease overall height from 3.21" to 2.16"
